Title Index

A Cloud Chamber Study of the Effect That Nonprecipitating Water Clouds Have on the Aerosol Size Distribution, 20:1

Airborne Fiber Separation by Electrophoresis and Dielectrophoresis: Theory and Design Considerations, 21:241

Analysis of Constant-Rate Aerosol Reactors, 20:363

A Numerical Investigation into the Sampling Performance of a Tube Sampler, 20:291

A Sonic Jet Corona Ionizer for Electrostatic Discharge and Aerosol Neutralization, 20:31

Authors' Response to Comments on "Coupling Thermodynamic Theory with Measurements to Characterize Acidity of Atmospheric Particles", 20:287

Bipolar Charging of Aerosol Particles in Electropositive Gas of High Purity, 21:37

Chemical Mass Balance Source Apportionment of PM_{10} during the Southern California Air Quality Study, 21:1

Chemical Signatures of the Los Angeles Aerosol ($d_p < \mu m$), 21:283

Cigarette Smoke Deposition in the Tracheobronchial Tree: Evidence for Colligative Effects, 20:215

Comments on "Coupling Thermodynamic Theory with Measurements to Characterize Acidity of Atmospheric Particles" by P. Saxena et al., 20:285

Computer Simulation of Monodisperse Aerosol Collection in Fibrous Filters, 20:149

Computer Simulation of Photophoretic Force on Rapidly Vaporizing Heterogeneous Droplet, 20:42

Condensation of Supersaturated Vapors of Dioctylphthalate: Homogeneous Nucleation Rate Measurements, 20:127

Deposition of Tobacco Smoke Particles in a Low Ventilation Room, 20:194

Determination of Water Activity in Ammonium Sulfate and Sulfuric Acid Mixtures Using Levitated Single Particles, 20:275

Development and Evaluation of a Low Cutpoint Virtual Impactor, 21:223

Dry Deposition Velocities as a Function of Particle Size in the Ambient Atmosphere, 20:239

Editorial, 20:135

Effect of Radiative Heat Transfer on the Coagulation Dynamics of Combustion-Generated Particles, 20:83

Effects of an Applied Electric Field on Collection Efficiency by a Charged Droplet for Dust Particles in Charged Droplet Scrubbers, 20:71

Effects of Carinal Ridge Shapes on Lung Airstreams, 21:119

Effects of Mixed Convection Flow on Aerosol Generation in a Condenser Tube, 20:136

Erratum, 21:94

Evolved Gas Analysis of Secondary Organic Aerosols, 21:306

Fourier Transform Infrared Spectroscopy of Aerosol Collected in a Low Pressure Impactor (LPI/FTIR): Method Development and Field Calibration, 21:325

Generation of Aerosol Particles by Boiling of Suspensions, 21:236

Gravitational Transport of Particles in Pure Gases and Gas Mixtures, 21:170

Inertial and Gravitational Deposition of Particles in a Square Cross Section Bifurcating Airway, 20:177

Influence of Coal Type on Water Spray Suppression of Airborne Respirable Dust, 21:110

Infrared Properties of Atmospheric Aerosol Constituents: Polyaromatic Hydrocarbons and Terpenes, 20:62

Intercomparison of Four Methods to Determine Size Distributions of Low-Concentration (~100 cm^{-3}), Ultrafine Aerosols ($3 < D_p < 10$ nm) with Illustrative Data from the A, 95

Investigations of the Collection Efficiency of an Electrostatic Precipitator with Turbulent Effects, 20:169

Length Separation of Fibers, 21:179
Letters to the Editor, 20:285

Mathematical Modeling of Silicon Carbide Whisker Deposition in the Lung: Comparison Between Rats and Humans, 21:193
Measurement of Particle Deposition Velocity Toward a Horizontal Semiconductor Wafer by Using a Wafer Surface Scanner, 21:72
Monte Carlo Simulation of Particle Coagulation and Sintering, 21:83
Motor Vehicle Contributions to Fine Carbonaceous Aerosols in Los Angeles, 21:360
Multifractal Analysis of Airborne Microcontamination Particles, 20:100

Non-Fossil-Fuel Fine-Particle Organic Carbon Aerosols in Southern California Determined during the Los Angeles Aerosol Characterization and Source Apportionment Study, 21:343

On the Source of the Submicrometer Droplet Mode of Urban and Regional Aerosols, 20:253
On the Sublayer Model for Turbulent Deposition of Aerosol Particles in the Presence of Gravity and Electric Fields, 21:49

Particle Deposition on a Truncated Cylinder in a Supersonic Flow at Low Pressure, 20:375
Particle Filter Based on Thermophoretic Deposition from Natural Convection Flow, 20:227
Particle Impaction on a Supersonic Cone, 20:318
Particle Losses in Glass Honeycomb Denuder Samplers, 21:137
Particle Mixing and Diffusion in the Turbulent Wake of a Single Cylinder, 20:111
Plugging Passages with Particles: Refining the Morewitz Criteria, 21:219
Properties of the Log-Normal Particle Size Distribution, 21:46

Seasonal Trends in Los Angeles Ambient Organic Aerosol Observed by High-Resolution Gas Chromatography, 20:303
Side Drift of Aerosols in a Two-Dimensional Slowly Oscillating Sonic Field, 21:149
Simulation of Brownian Coagulation in the Presence of van der Waals Forces and Viscous Interactions, 20:207
Size- and Composition-Dependent Response of the DAWN-A Multiangle Single-Particle Optical Detector, 20:345
Submicrometer Aerosol Generator Development for the U.S. Environmental Protection Agency's Human Exposure Laboratory, 20:51

The Additivity and Stability of Carbon Signatures Obtained by Evolved Gas Analysis, 21:294
The Characteristics of Ionic Wind and Its Effect on Electrostatic Precipipitators, 20:330
The Los Angeles Aerosol Characterization and Source Apportionment Study: A Meteorological–Air Quality Analysis, 21:269
The Los Angeles Aerosol Characterization and Source Apportionment Study: An Overview, 21:259
Thoron Versus Radon: Comparison of Measured Progeny Aerosol Size Distributions, 20:266

Use of Chain Code Histogram Method to Quantify Airborne Particle Shapes, 21:210
Use of Multiple Fractal Dimensions to Quantify Airborne Particle Shape, 20:161

Wind Tunnel Experiments of Large Particle Reentrainment–Deposition and Development of Large Particle Scaling Parameters, 21:157
